Resuscitation Suite Mobile App for BLS, ALS, PALS and NALS

Your On-Demand Cognitive Aid for Training and High-Stakes Care

The American Red Cross Resuscitation Suite App puts lifesaving support directly in the hands of learners and clinicians.

Powered by Redivus Health, this innovative tool acts as an intuitive cognitive aid, equipping users with real-time protocol guidance, clear decision prompts and effortless documentation during both training scenarios and high-stakes resuscitation events.

Critical guidance. Immediate clarity. Better performance when every second counts.

Key Features

Launch Training or Care Events
Handle Cardiac Arrest, Tachycardia and Bradycardia for Adults & Pediatrics
Select Patient Type

View Timers and Follow Prompts
Access Reference Cards
Document Interventions
Timestamp All Activities/Create Note

Designed to support clinicians across a wide range of needs, the app integrates BLS, ALS, PALS and NALS clinical tools, including Red Cross code and reference cards, along with protocol prompts, heads-up timers and real-time, timestamped documentation that can be easily downloaded.

Comprehensive List of Application Features

Application
Device type: iPhone, Android, Tablets
Operates with or without WiFi
Easy to use, intuitive user experience
Resuscitation Event Guidance
Heads-up timer display for compressions, epinephrine and amiodarone
Metronome for appropriate compression rate
Audio voice prompts
Breathing and pulse analysis
Defibrillation guidance
Epinephrine and amiodarone time and dose
Pediatric medication weight-based dosing
Recommended cardioversion joules based on rhythm
Recommended medications and dosing
Reference Materials
View care algorithms and flow charts

Resuscitation Event Documentation
Robust documentation of all med administration
Unstable patient basic assessment
Pulseless event assessments
Interventions
Monitors and documents length of time team is providing care for unstable patient
Free text and standard comments
Team members
Ability to document activities performed prior to app use
Ability to edit note after event
Create and email completed note
Post Resuscitation Care
Post resuscitation guidance
Post resuscitation documentation

With streamlined access to essential information and guided support at every step, the Resuscitation Suite App helps learners and clinicians stay confident, consistent and ready to deliver high-quality care anytime, anywhere.
